

## Data Analyst

Porto

**Dellent Consulting** is a Portuguese consulting, technology services and outsourcing company, focused mainly on IT and Telecommunication services.

We are always looking for bright and driven people who have a penchant for technology and want to hone their skills. If you are interested in challenging work and solving complex problems through technology - then **Dellent is right for you!**

### Requirements:

- Solution development and implementation: designing and then implementing analytics solutions across multiple online properties to provide data structures leading towards a single-source of truth;
- System documentation: consistently documenting activity concisely and clearly to ensure that administration of the system can effectively be understood by other users;
- Requirements gathering: working with business teams to understand what they are trying to learn, and translating these needs into technical solutions;
- Quality assurance and troubleshooting: auditing systems at a macroscopic and microscopic level to identify potential problems that could compromise data accuracy;
- Property integration: leading on the integration of multiple online properties towards a single analytics solution;
- Google Analytics and Google Tag Manager super-user, as well as familiarity with similar technologies (WebTrends, Coremetrics etc.) an advantage;
- In-depth expertise with HTML, webpage tagging structures and scripting languages, and JavaScript;
- Able to build comprehensive site tagging specifications or requirements, along with QA test for site tags;
- Familiar with troubleshooting and debugging implementations to quickly and efficiently measure data integrity; analysing implementations for problems and proactively managing issues
