# What is Mendeley?

# What is Mendeley?

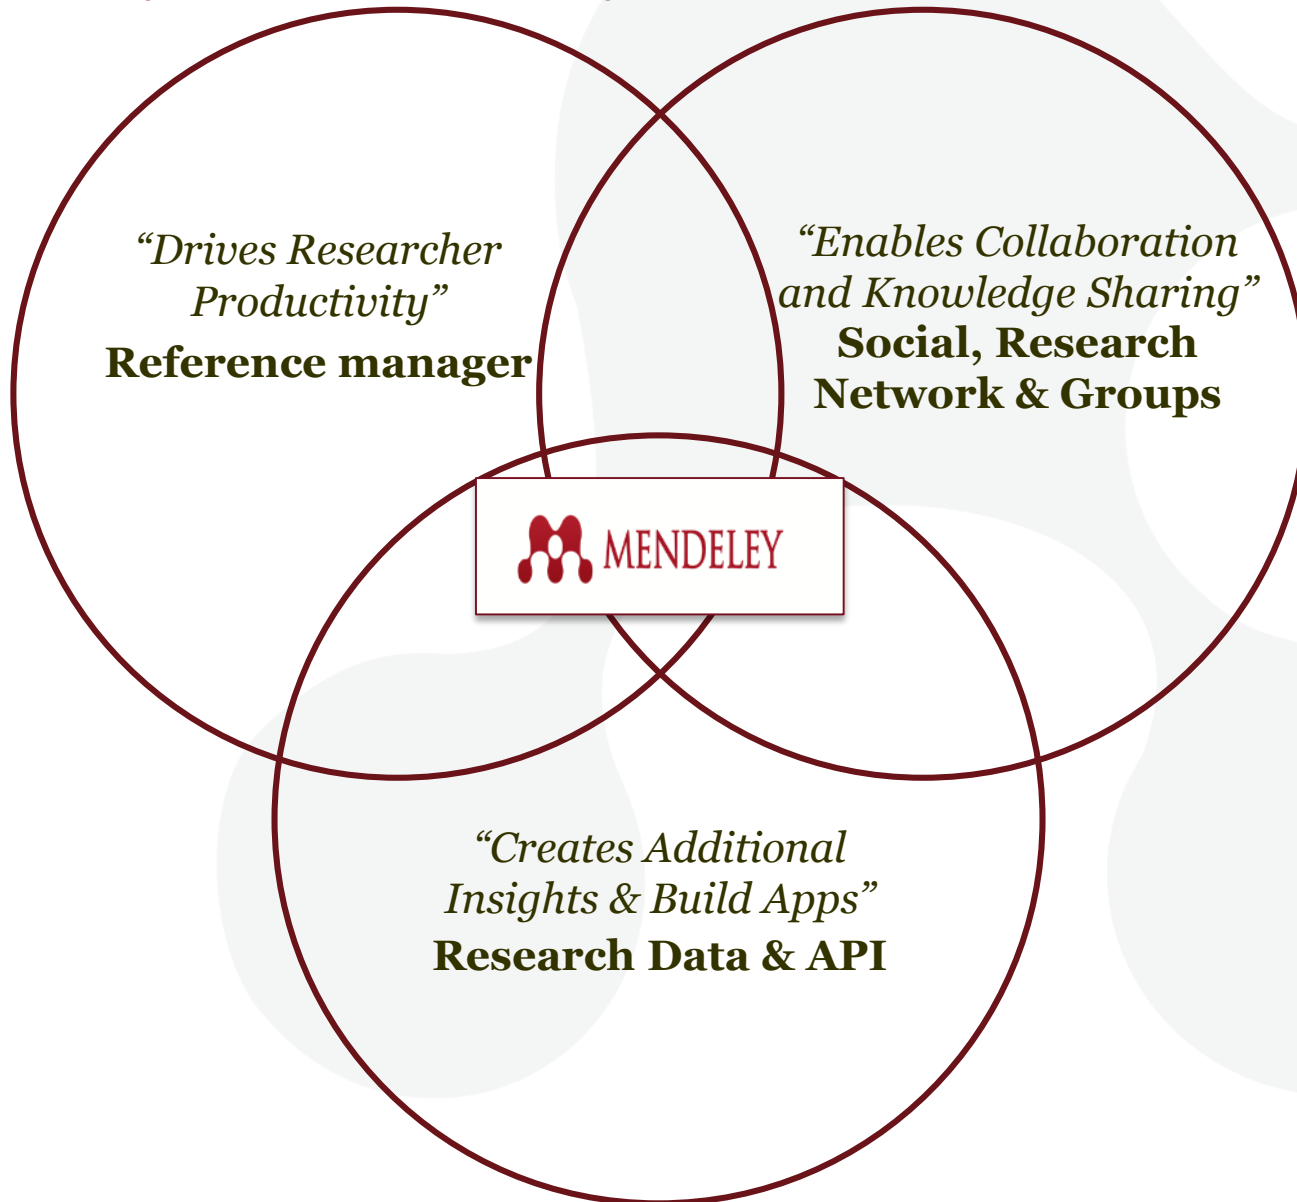

...and a **social & academic collaboration network** with 4 Million users to connect like-minded researchers & discover research trends and statistics.

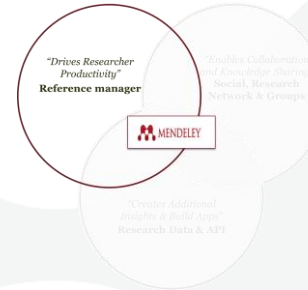

Mendeley is a **reference manager** allowing you to manage, read, share, annotate and cite your research papers...

... forming a **crowdsourced database** with a unique layer of **social research information** and an **Open API**

# Mendeley's Three Key Values

# How Mendeley drives researcher productivity

## Add and organize PDFs

Import and organize PDFs from your computer, EndNote™, RefWorks, Papers, Zotero, Mendeley importer, ScienceDirect, and Scopus

**Content-based recommendations:** The us recommended items similar to the on preferred in the past;  
**Collaborative recommendations:** The us recommended items that people with si and preferences liked in the past;

and preferences liked in the past;  
 recommended items that people with si

## Read and annotate

Open PDFs and capture your thoughts through sticky notes and highlights.

## Reference Manager

Generate citations and bibliographies in Microsoft Word, OpenOffice, and LaTeX. 7,500 citation styles!

# How Mendeley enables collaboration

## Collaborate and interact

Find and connect with colleagues and securely share your papers, notes and annotations.

## Backup and sync

Access your papers on the desktop, web, iOS, and Android

## Network and discover

Create an online presence with your own academic profile and network with other researchers globally. Discover papers and public groups.

Winnifred Wong  
Happy New Year everyone! In January 2016, we will be running Mendeley classes in small groups, starting on 23 Jan (a Saturday morning) in Central Library. Look out for an email containing details to all NUS students next week. Please spread the word to your course mates and friends.

Comment · 11th January

You and YunTing Soong like this.

Shou De Loi added a document to this group

A novel class of eukaryotic zinc-binding proteins is required for disease resistance signaling in barley and development in C. elegans.

Like · Comment · 13th November, 2015

Winnifred Wong  
I got a question from a former user of Endnote who is now using Mendeley:  
Is there a similar function like 'smart group' as they have in EndNote for Mendeley? i.e. automatically creates a group according to the criteria that I set? e.g. all works with a publication date of 2010 and later.  
Does anyone have a better solution than using tags (which was my answer)?

Group activity

Kristen Eller added documents to this group

Analysis of the lifetime and spatial localization of Hydrogen peroxide generated in the cytosol using a reduced kinetic model.

Quantifying intracellular hydrogen peroxide perturbations in terms of concentration.

In-depth characterization of the fluorescent signal of HyPer, a probe for hydrogen peroxide, in bacteria exposed to external oxidative stress.

19th August, 2015

Joseph Lim added documents to this group

Macrophage signaling and respiratory burst.

Superoxide and hydrogen peroxide in relation to mammalian cell proliferation

Hydrogen peroxide as a signaling molecule.

Localizing NADPH oxidase-derived ROS.

Compartmentalization of redox signaling through NADPH oxidase-derived ROS.

And 48 more
